Education

Indian Institute of Technology, Roorkee <i>BTech Civil Engineering; Fundamentals of ML, IEC-03 AI Techniques, CSL-537 DL.</i>	<i>August 2022 – Present</i>
GD Goenka Public School, Lucknow <i>Senior Secondary Education 95.2%; Physics, Mathematics and Computer Science.</i>	<i>April 2019 – May 2021</i>
City Montessori School, Lucknow <i>Secondary School Certificate 96.6%; Physics, Mathematics and Computer Science.</i>	<i>April 2008 – May 2019</i>

Experience

AI Intern Swiggy, CEO's Office o Built multi-agent conversational recommender for Swiggy Scenes using LangGraph, Llama-2, multimodal (Text and Vision) GraphRAG embeddings, and retrieval-based ranking models. o Designed LLM backend on Firebase, Cloud Functions, integrating Apify-Snowflake data pipelines for lead analytics and intent-to-action workflows. CRM with Cimba AI, React, and Node.js, to automate lead scoring and assignment.	<i>Bangalore, KA May '25–Aug '25</i>
AI Engineer Intern Akki AI o Copilot for startups: Built multi-agent conversational and CUA system using CrewAI, LangGraph, and HybridRAG with startup specific personas and dynamic memory (Trends/Core values). o Designed RLHF-inspired evaluation protocols with preference scoring, feedback logging, and deployed scalable agent clusters on AWS EC2 (FastAPI, Celery) for distributed workloads.	<i>Remote, Delhi Dec 24–Apr 25</i>
AI Engineer Intern EzAIx Inc. o Built multi-agent onboarding assistant: OpenAI CUA, LangGraph, GPT-4 Vision, and RAG for Microsoft Suites. o Selenium for autonomous UI control and real-time context understanding via vision, dialog, and task agents. o FastAPI, Celery and MongoDB Atlas microservices for async orchestration and vector-based multi-tenant retrieval.	<i>Remote, US Mar 25–Apr 25</i>
Data Science Intern Mindshift Analytics o Built scalable algorithms analyzing fuel efficiency and vehicle dynamics from GIS telemetry across mining fleets. o RDP trajectory simplification, DBSCAN clustering, pipelines for anomaly detection, performance insights	<i>Remote LoR Aug 24–Oct 24</i>
Machine Learning Intern Strabag-Efkon India o Fleet Optimization algorithm tool with custom ML pipelines and Linear Programming (PuLP) for reduced response time of emergency vehicles with double coverage of accident locations, implemented on Hyderabad-ORR, ensuring 8 & 10-min primary & secondary time, 100 % coverage & 80% reliability. o Built modular scripts in Python which is now being scaled by the company on other Indian National Highways.	<i>Gurgaon GitHub Jun –Jul 24</i>

Research and Publications

- o Agam Pandey, et al. “CroPA++: Exposing Vulnerabilities in Vision Language Models and Enhancing Adversarial Transferability of Cross-Prompt Attacks” [NeurIPS Reliable ML Workshop \[OpenReview\]](#)
- o Agam Pandey, et al. “Revisiting CroPA: A Reproducibility Study and Enhancements for Cross-Prompt Adversarial Transferability in Vision-Language Models.” [MLRC TMLR \[OpenReview\]](#) [Best Paper Award](#)
- o “Zero-Shot Vision Language Reasoning via Dual-layer Scene Graph Chain of Thoughts” [AAAI-26 Student Abstract Paper](#)
- o “TransPatch: Learning Universal Adversarial Patch for ViT–CNN Cross-Architecture Transfer in Semantic Segmentation” [AAAI-26 Student Abstract, Paper](#)
- o Agam Pandey, et al. “StegGNN: Learning Graphical Representation for Image Steganography.” Submitted to ICCV 2025 (CV4DC Workshop). [Manuscript rejected; under revision for resubmission] [Submission](#)

Projects

Hybrid IR RAG Recommendation system with Langchain Planner o Designed and evaluated a production-ready hybrid recommendation/IR system combining BM25, BGE dense retrieval, weighted RRF fusion, and a fine-tuned MiniLM cross-encoder, improving val recall@10 from 0.08 (BM25) to 0.46. o Built a structured query planner with Pydantic json and LLM-guided rewrites (Qwen-2.5B with schema constraints), enabling intent/skill/constraint injection before retrieval, 2× recall@10 gains over retrieval-only baselines. o Ablation studies on candidate depth, fusion weights, and rerank depth (train/val 52/13), identifying top-200 RRF candidates, rerank@10 as the optimal quality–latency trade-off for CPU-only deployment.	<i>GitHub App HF API</i>
ByeLabs: Local Multi-Agent Document Processor HiLabs AIQuest Hackathon o An end-to-end automated roster system converting diverse raw mails into structured Excel exports and analytics. o Fine-tuned SLM (Qwen3-4B-Instruct) with GRPO and LoRA adapters for robust schema-aware data extraction, normalization, and validation from noisy unstructured documents.	<i>GitHub Finals</i>

- A fully local processing pipeline with observability, versioning, rollback, and production-grade monitoring (Prometheus, OpenTelemetry, Grafana), ensuring data quality, auditability, and compliance without reliance on third-party APIs.

DL Playground| Data Science Group, IIT Roorkee

[GitHub](#)

- Built interactive drag-and-drop deep learning architecture playground with real-time tensor inference and validation.
- Implemented automatic shape propagation across Conv2D, Pooling, Transpose, Add, Concat, Flatten, and Linear layers.
- Developed compiler-style error detection with visual debugging for tensor dimensions and PyTorch code generation.

FeedCode | Data Science Group, IIT Roorkee

[GitHub Repo](#)

- Built FeedCode, LLM-driven system infers user's coding style from solved problems for personalized code feedback.
- Designed a dual-LLM pipeline for coding-style reasoning and snippet evaluation to generate context-aware feedback.
- Lightweight Flask-MongoDB backend integrating ML workflows for real-time style analysis and code comparison.

Knowledge Graph Embeddings for GraphRAG LLMs | Data Science Group

[GitHub](#) | [Gitbook](#)

- Quantitatively analyzed CLIP/USE's image & text embeddings with UMAP, t-SNE and PCA for dimension reduction.
- Integrated knowledge graph embeddings to enhance contextual understanding for RAG-LLMs.
- Developed deployed pipeline to create Knowledge Graphs for images and text within a same vector space.

Multimodal Agentic GraphRAG: Zomato Nugget | Data Science Group

[GitHub](#)

- Developed RAH Chatbot, a Gen AI HybridRAG system with multimodal chunking and a MongoDB data lake.
- Weaviate (vector+BM25), Neo4j (graph) with a LangChain ReAct agent (TinyLlama) for contextual responses.
- Deployed application with Docker + FastAPI with LangFuse observability, enabling scalable end-to-end analytics.

Boosting Ensemble Predictive Modeling for Match Outcomes| Amex Superbowl'24

[GitHub](#)

- Feature engineered batsman/bowler/match statistics temporal windows, generating high-signal team-strength features.
- Trained XGBoost/LightGBM/CatBoost with GridCV tuning, constraints, and leakage-safe temporal validation.
- Built a boosted ensemble inference pipeline with class probabilities and per-model feature attribution.

Spatiotemporal Attention for Trajectory, Conflict Zone Prediction with PET

[GitHub](#)

- Developed and trained SDT-ATT model for highway trajectory forecasting using real-world lane-change datasets.
- Modeled vehicle interactions with social tensors, temporal attention for 20-frame history and 30-frame prediction.
- Optimized PyTorch pipeline for applications, enabling conflict zone prediction and multi-agent collision avoidance.

Tech Enhanced AI Interview Platform| Techshila | STC IITR

[AI Interview Platform](#)

- Developed ML model for interview question generation, using Mistral 7B LLM fine-tuned with Q-LoRA adapters.
- Integrated Faster Whisper for Automatic Speech Recognition & CTranslate2 for automatic speech-text conversion.
- Deployed the model on HuggingFace, with a frontend for inputs and a Flask API backend for audio processing.

Skills

Programming Languages: Python, SQL, PyTorch, DSPy **Machine Learning/NLP:** scikit-learn, Hugging Face, spaCy, NLTK, Pandas, NumPy, LangChain, LlamaIndex, Opentelemetry, CrewAI, mem0, W&B, MLFlow, vLLM. **Tools:** Docker, Kubernetes, Git/GitHub, AWS, GCP, Firebase **API Frameworks:** Django, FastAPI, Flask **Databases:** MySQL, Neo4j, MongoDB.

Extra Curricular

Program Committee Member | AAAI 2026

May 2024 – Present

- Invited as Program Committee Member for AAAI-26 SAPP to review research paper submissions.
- Recognized as senior author at AAAI-26 SAPP, contributing to program quality and academic standards.

Joint Secretary | Data Science Group, IITR

May 2024 – Present

- DSG, a undergrad run group works on innovative open source projects in the domain of Machine/Deep Learning.
- Organized hackathons and industry collaboration with [WWT](#) and Drexel University for research projects.

Joint-Secretary | Athletics IITR, Institute Sports Council

July 2024 – Present

- Co-Led the institute team of 50+ athletes with the Secretary, fostering a strong track & field culture. Run Club.
- Coordinated training sessions, events like Annual Athletics Meet and Fitness Camp for campus residents.
- Inter Hostel'24, Institute Trophy'24: Team Gold (Captain), Gold (5000m), Silver (800m, 4x400m Relay);

Vice President-Analytics | SocBiz, IITR

Feb 2023 – Present

- Mentored a team of 30 juniors for Analytics, covering Prob & Stats, SQL, EDA, ML models in weekly sessions.
- Led Industry and research collaborations for analytics and dev with professors and startups
